FAITH & SCIENCE [???

1. What is MY FAITH? ???
2. How MY education & faith[fulness] interplayed in applied science.
3. How MY faith[fulness] is expressed in MY work.
4. No [intellectual] contradictions between MY faith[fulness] & MY work.

1. What is MY FAITH? ???

In Early English

Belief meant "trust in God" while **faith** meant "loyalty to a person ...*faithful*..."

Old English; Old French

14th C: faith...took on [a] religious sense

16th C: belief had...become ..."mental acceptance of something as true" [or] "things held to be true as a matter of religious doctrine [or creed]"

www.etymonline.com

1. What is MY FAITHFULNESS?

Creation is Incomplete & Unfolding

I try to use my brain & abilities to:

- **Be faithful to the Tradition**
I am taught & study
- **Contribute positively, as part of a community, to Creation**

2. How MY Education & Faithfulness Interplayed in Becoming an Applied Scientist

Creation is Incomplete & Unfolding

- People, in communities, helped to prepare future generations to contribute to completing Creation**
- My Tradition changes when people & communities gain 'in-sights'**
- Changes may happen very quickly**

3. How MY Faithfulness is Expressed in MY Work

Creation is Incomplete & Unfolding

**Working within Communities,
I am Expected to Use my Brain &
Abilities to Contribute to Creation**

4. [Intellectual] Contradictions do not occur between MY Faithfulness and MY Work

Practical Contradictions Occur

I Run Short of Time
