

## **BiN SEMINAR SCIENCE & FAITH 13.11.22**

---

### **PRESENTATION PAPER BY SHAABAN EL-BASET MUSLIM FAITH**

Science explains our concept of the urban life and religion explains our concept of the spiritual life.

And if there is a difference between religion and science, it is a difference in our conception.

Since we are on the belief that knowledge and religion are from God, there should be no difference.

And I believe that religion and science are in two parallel lines, because we have not reached complete knowledge, nor our complete understanding of religion, because the one who fully understands these matters is God Himself. And we do not have all knowledge except a little. This is a verse from the Holy Qur'an. Science has not yet been able to prove or deny that there is heaven or hell. It does not prove or deny that there are angels, but we believe in that. At the same time, there are many phenomena that have no explanation. We need science and religion to be in a state of balance in our lives.

Thank you

**Shaaban El-baset**
